

Sponsor and Exhibitor Information

The Canadian Biosafety Symposium 2008 enables companies and other organizations involved in biosafety to connect with leaders and decision makers from across Canada's biosafety and biosecurity community. The Symposium provides the venue to feature the availability and value of biosafety products and services, and to gain the attention of people who make the crucial decisions in their selection and procurement.

The event will bring together more than 200 biosafety professionals, biocontainment facility managers and laboratory scientists from government facilities, universities and the private sector. It will feature presentations and posters on an array of biosafety topics, including microbiological techniques, laboratory facilities and equipment, biosecurity measures, and infectious diseases affecting humans and animals. This annual event enables the Canadian biosafety community to learn and share knowledge with colleagues from across Canada and other countries.
